Original export pack path: exports/checkins-review/monthly-review-copy-pretest-fix-pack

Reviewer data note: Testing / sandbox data only. Do not use for real private user data review.

Screenshots included:

- 01-wellbeing-section-copy.png: Monthly Review wellbeing section showing the replacement user-facing body copy.

Known limitations:

- 02-carry-forward-info-proof-or-note.png was not exported because the carry-forward info entry is not currently exposed through a direct visible Monthly Review info control in this tiny pass.

- The compatibility/routing audit result is documented here instead.

- The stale carry-forward info entry was rewritten for backward compatibility / focus-routing safety, but there is no current user-visible Monthly Review surface that opens this info content directly in the tiny pre-test pass. See index.md for the audit result.

Review the wellbeing ratings and notes carried through from each week, then notice what the month is showing you.
